Manufacturing books in the USA ensures compliance with strict environmental laws and eliminates the need for international freight shipping, a major contributor to global air pollution. Printing on recycled paper helps minimize consumption of trees, water, and fossil fuels. The 19th Edition of *The Merck Manual* uses paper with 10% post-consumer waste. According to Environmental Defense's Paper Calculator, the following environmental benefits were achieved:

Trees Saved: 609 • Air Emissions Eliminated: 57,930 pounds • Water Saved: 279,000 gallons • Solid Waste Eliminated: 16,939 pounds
