Back Pain

Some less common causes of lower back pain include:

- Shingles
- Some types of inflammatory arthritis, such as ankylosing spondylitis

Certain urinary tract disorders, such as kidney infections, kidney stones, and prostate infections

Certain disorders involving the pelvis, such as ectopic pregnancy, pelvic inflammatory disease, and cancer of the ovaries or other reproductive organs

Less common causes that are not as serious include shingles and several types of inflammatory arthritis, such as ankylosing spondylitis.
